The Cancer Resilience Code

# Arisha Patel, MD, MBA

Precision Oncologist · Physician-Scientist · Founder and CEO

Arisha Patel, MD, MBA is a triple board-certified Oncologist, Hematologist, and Internist, an NIH-funded physician-scientist in machine learning, and a former Senior Medical Director of Personalized Healthcare at Genentech, where her basket trial work supported NCCN guideline recommendations. She served as Adjunct Clinical Instructor in Oncology and Hematology at Stanford. She is the Founder and CEO of BioNurture, a concierge oncology practice for prevention and survivorship, and BioSynova, the clinical intelligence company developing the Cancer Resilience Index. She has worked in the clinic, the research lab, the drug industry, and the academic center, and she is building what comes next.

## Talks

---

### Cancer Is Not an Event

The case for predictive cancer care, and what it takes to read risk years before a diagnosis.

### A Pattern Is Not a Decision

Where AI belongs in medicine, where it does not, and how to build clinical intelligence physicians can stand behind.

### The Missing Decades

Survivorship is oncology's largest unbuilt system. What comes after treatment, and who is responsible for it.

### What the Dying Teach the Living

Stories from the bedside on fear, cure, meaning, and how to live.

---

Precision Oncology. Before the Diagnosis. Beyond the Treatment.
